

ShipNeXus, LLC provides practical logistics, distribution, and operations consulting for manufacturers, distributors, public agencies, and prime contractors. We help organizations improve the flow of materials, information, and work from receiving through fulfillment and shipping, with an emphasis on measurable, floor-ready implementation.

CORE COMPETENCIES

- Logistics & physical distribution consulting
- Shipping & receiving process optimization
- Warehouse workflow, staging & material-flow improvement
- Inventory control, cycle-counting & fulfillment process improvement
- Transportation and freight-process improvement
- SOP development, process mapping & workflow design
- Productivity, throughput & bottleneck improvement
- Operational assessments, implementation support & workforce training

KEY PERSONNEL EXPERIENCE

14+ years of hands-on warehouse, logistics and operations leadership

- Leadership experience across shipping, receiving, inventory control, cycle counting, fulfillment and warehouse flow.
- Experience supervising warehouse teams of approximately 30 employees and supporting day-to-day production priorities.
- Manufacturing-floor exposure supporting CNC/laser operations, quality, shipping/receiving and cross-functional execution.
- Practical experience developing procedures, improving work flow, coordinating carriers and supporting operational change.

IDEAL ENGAGEMENTS

- Warehouse or shipping/receiving process assessments
- SOP and work-instruction development
- Material-flow and staging redesign
- Inventory/fulfillment process improvement
- Prime-contractor logistics support and project-based implementation
